When do you need it?

The actual coordinates and a figure showing the actual sampling locations would be nice..or confirmation that nothing changed between the QAPP and the field (which, as you noted, is highly unlikely).

If you don't already have a figure and/or a table with this information, then I realize we can pull it from the EDDs.

Is there something you specifically need from us that we could provide?

>>> "Vaughn, Stephanie" <Vaughn.Stephanie@epa.gov> 5/23/2013 11:12 AM >>>

You know, things do sometimes change between the QAPP and the actual field effort..

Thanks :)

A table correlating the locations on the figure to the station id's used in the spreadsheets would help..I don't see one on Sharepoint.

You mean this? I have attached Figure 1 from Appendix of the SV-CWCM QAPP. Let me know if you are looking for something else.

Hi Rob - could you send a figure showing the station locations?

Thanks

AECOM will post the data to the LPR Sharepoint; they are large spreadsheets

Rob,

We have not received the physical measurements data taken during the svCWCM sampling events (turbidity, pH, etc). Can you provide those -maybe in a spreadsheet-?

Thanks,

eugenia
